March 2007 Product Release

For immediate release

New Miniature Surface Mount Bias Tee from 10 MHz to 30 GHz

Morgan Hill, CA 3/2/07 - [Marki Microwave, Inc.](#), premier supplier of microwave mixers and mixer-based components for commercial and military markets, introduces a new broadband surface mount bias tee with inputs from 10 MHz to 30 GHz. For applications where external biasing is required, this miniature bias tee is a complete biasing solution for sub-assemblies and system solutions.

The [BT-0030](#) is a surface mount bias tee from 10 MHz to 30 GHz with 1 Watt RF Power Handling, Low DC Resistance <1 Ohm, High DC Current 500 mA, 1 dB typical conversion loss. Measuring at just .240x.150, this space-saving, miniature bias tee is constructed with high temperature solder for reflow solderability. Evaluation boards are available.

Marki Microwave, Inc. is the premier manufacturer of microwave mixers worldwide, offering the industry's most comprehensive line of signal processing products up to 65 GHz. Marki's extensive product line includes mixers, doublers, multipliers, and specialty components ranging from amplifiers to DC blocks and bias tees. Marki Microwave employs precision assembly using both solder and wire bonding techniques. Test facilities include state-of-the-art equipment for measurement from DC to 65 GHz. All assembly, inspection, and testing is done onsite to assure uniformity and repeatability of performance. Marki Microwave is certified to ISO 9001:2000.
