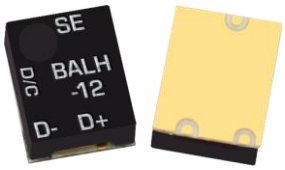
LEAD-FREE / RoHS-COMPLIANT

HIGH POWER SURFACE-MOUNT BALUN

BALH-0012SSG

Features

- 10 MHz to 12 GHz 1:1 Balun (Balanced to Unbalanced Transformer)
- High 37 dBm 1-dB compression enables high power applications
- Tuned for Optimal Phase/Amplitude Balance
- Applications: Analog to Digital Converters, Balanced Receivers, Baseband Digital Modulation, Signal Integrity
- BAL-0012SSG.s3p



SMT

Electrical Specifications - Specifications guaranteed from -55 to +100°C, measured in a 50Ω system.

Parameter	Frequency Range	Min	Typ	Max
Insertion Loss as a mode converter (dB)	10 MHz to 12 GHz		2	3.5
Nominal Phase Shift (Degrees)			180	
Amplitude Balance (dB)			0.6	1.8
Phase Balance (Degrees)			5	12
Common Mode Rejection (dB)		16	25	
Isolation (dB)			5.5	
VSWR (Common)			1.7	
VSWR (Output)			1.35	
Input 1dB Compression (dBm)			37	

Model Number	Description
BALH-0012SSG	10 MHz to 12 GHz Balun, Surface Mount, LEAD-FREE/RoHS COMPLIANT
EVAL-BALH-0012	Connectorized Evaluation Fixture, LEAD-FREE/RoHS COMPLIANT

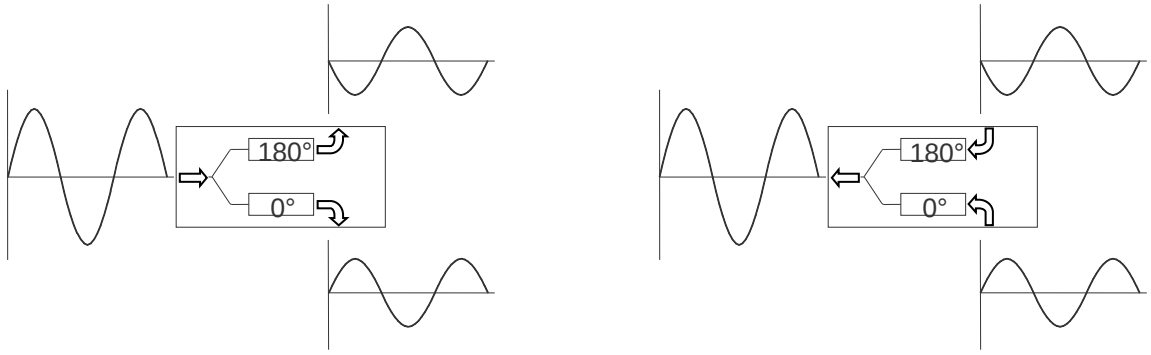
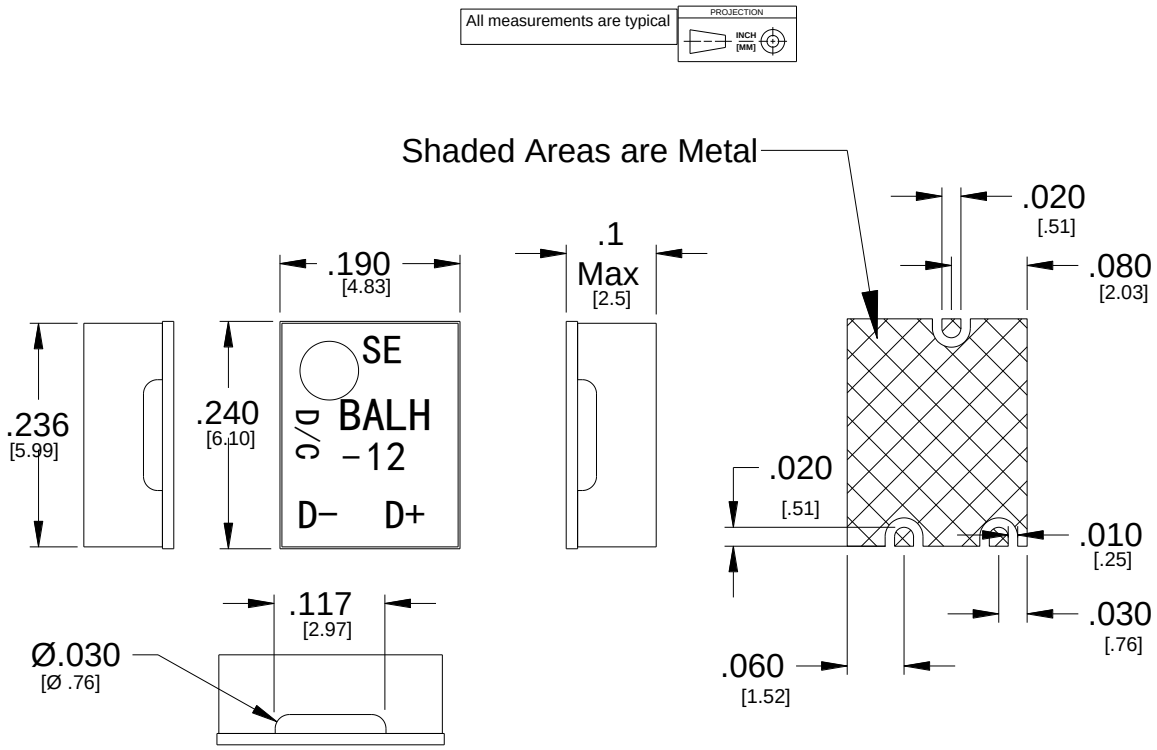
HIGH POWER SURFACE-MOUNT BALUN BALH-0012SSG

Block Diagram



Single ended to differential **Differential to single ended**

Outline Drawing



Substrate material is 8-mil thick Rogers 4003, 1 Oz Rolled Cu. I/O Pads & Ground Plane Finish is Gold, 2 to 8 µ-inches, over solderable Electroplated Nickel, 100-200 µ-inches per QQ-N_290A. Or ENIG

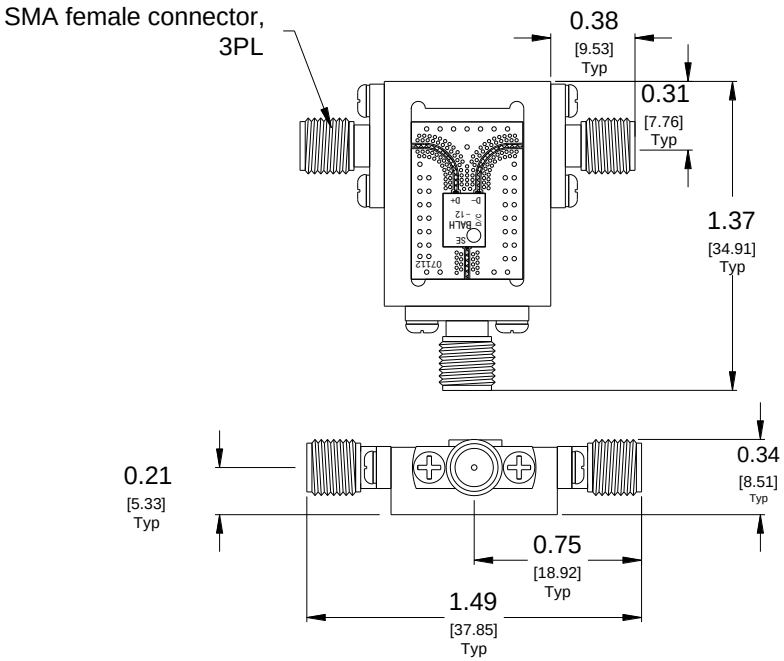
Eval Package Outline Drawing



Mixed Mode Scattering Parameters[1]

Mixed mode scattering parameters are used to characterize differential circuits. For baluns, this means that the 0° and 180° ports become a single differential port and the common port remains common port. The two-port s-parameters of the balun are then characterized based on differential (d), common mode (c), or single-ended (s) signals. For example: Sds12 is the differential output response given a single ended input.

DC Interface

Port	Description	DC Interface Schematic
Common Port / In (Unbalanced)	The common port is DC short to ground.	Out 1 / 0° Port (Balanced)	The 0° port is DC short to ground.	Out 2 / 180° Port (Balanced)	The 180° port is DC short to ground.	
Absolute Maximum Ratings	
Parameter	**Maximum Rating**
DC Current	TBD
RF Power Handling	33 dBm
Operating Temperature	-55ºC to +100ºC
Storage Temperature	-65ºC to +125ºC

DATASHEET NOTES:

1. Sdd11: differential return loss of the differential port driven with a differential signal
   Sdc11: differential return loss of the differential port driven with a common signal
   Sds12: insertion loss from a single ended input to a differential output
   Scc11: common mode return loss of the differential port driven with a common signal
   Scd11: common mode return loss of the differential port driven with a differential signal
   Scs12: insertion loss from a single ended input to a common output
   Sss22: single ended return loss
   Ssd21: insertion loss from a differential signal to single ended output
   Ssc12: insertion loss from a common signal to single ended output
