## END OF PRODUCT LIFE ANNOUNCEMENT

Marki Microwave is announcing the end of product life for numerous legacy frequency multipliers (“doublers”). Despite our multi-year attempts to maintain a viable diode supply, we have been informed by our sole supplier that they will no longer support us with these diodes. As a result, Marki will be discontinuing the following doublers and recommending as replacements the MMICs listed below:

EOL PART NUMBER	REPLACEMENT MMIC
D-0250	MMD-2060
D-0265	MMD-2060
D-0365	MMD-3567
D-0515	MMD-1030
D-0840	MMD-1030
D-1550	MMD-2060
DAD-1840	AQA-2156

Effective immediately Marki will no longer accept requests for quotes or purchase orders for these legacy doublers beyond current stock availability. We have a limited supply of diodes on hand to fill existing orders; regretfully we cannot guarantee customers a last time buy and any existing stock will be issued on a first come first serve basis.

For any questions regarding the above information, please contact:  
[info@markimicrowave.com](mailto:info@markimicrowave.com).

For more information on the replacement MMICs, please visit our website:  
<https://www.markimicrowave.com/multipliers/multipliers-products.aspx#all-multipliers>

Please route this announcement to any and all concerned personnel within your organization.

Best regards,

Elizabeth LaGreca  
Director, Sales Operations  
Marki Microwave, Inc.
