END OF PRODUCT LIFE ANNOUNCEMENT

Marki Microwave is announcing the end of product life for numerous T3 Mixer products. Despite our multi-year attempts to maintain a viable diode supply, we have been informed by our sole supplier that they will no longer support us with these diodes. As a result, Marki will be discontinuing the existing T3 Mixer part numbers that operate at 18 GHz and above. A replacement diode has been identified and qualified as a suitable replacement; new part numbers and datasheets will be released in the coming weeks/months.

[Please see the affected part numbers and the recommended replacements on the attached Appendix A.](#)

Effective immediately Marki will no longer accept requests for quotes or purchase orders for these T3 products beyond current stock availability. We have a limited supply of diodes on hand to fill existing orders; regretfully we cannot guarantee customers a last time buy and any existing stock will be issued on a first come first serve basis.

For any questions regarding the above information, or how to acquire samples of recommended product replacements, please contact info@markimicrowave.com

Please route this announcement to any and all concerned personnel within your organization to assure that requests for quotations and orders are received in a timely fashion.

Best regards,

Elizabeth LaGreca
Director, Sales Operations
Marki Microwave, Inc.
